Bandar Baru Bangi, Selangor

SUMMARY

Dedicated Software Development student at UTeM seeking internship placement (28 Sep 2026 – 12 Mar 2027) with strong academic performance (CGPA 3.81, Dean's List). Experienced in full-stack web, mobile and desktop application development across multiple industry and academic projects. Passionate about applying AI integration and software engineering principles to solve real-world problems.

EDUCATION

Bachelor of Computer Science (Software Development) With Honours

October 2023 – Present

Universiti Teknikal Malaysia Melaka (UTeM), Durian Tunggal, Melaka

- **Related Subjects:** Web Application Development, Mobile Application Development, Artificial Intelligence, Distributed Application Development, Software Engineering
- **CGPA:** 3.81 (Current) | Dean's List

Matriculation Programme (Computer Science)

July 2021 – May 2023

Kolej Matrikulasi Pulau Pinang, Kepala Batas, Pulau Pinang

- **CGPA:** 3.83

ACADEMIC PROJECTS

QLINIC – University Clinic Management System — Web Application

Final Year Project | Ongoing

- Architecting a full-stack university clinic management system (PHP + MySQL) serving 4 user roles; Student, Staff, Doctor, and Admin covering the full patient journey from online queue registration to treatment recording and analytics reporting
- Integrated Gemini AI across 6 system features including an AI symptom checker that assesses student-reported symptoms and returns urgency level and likely conditions and a treatment suggestion engine that pre-fills doctor consultation forms with AI-generated medication and care advice
- Built a real-time queue engine with dynamic wait-time estimation, priority escalation alerts, daily-rotating QR check-in, automated no-show detection via a background worker, and suspension logic for repeat no-shows with email notifications via PHPMailer for reminders and priority events
- Developed a multi-dashboard analytics module with weekly/monthly/yearly KPI tracking, doctor workload reports, diagnosis trends, and AI-generated commentary with PDF export support for clinic administration

Automation of Risk Based Inspection (AutoRBI) — Ipetro Service Sdn Bhd

Workshop 2 | Group Project

- Developed a full-stack desktop application (Python + CustomTkinter) automating Risk-Based Inspection (RBI) report generation by integrating an OCR/AI extraction pipeline to process vessel inspection drawings (PDF/JPG), reducing manual data entry effort by ~50%
- Engineered a multi-threaded equipment extraction engine with real-time progress tracking, enabling parallel processing of multiple vessel components while maintaining database transaction integrity
- Implemented role-based access control (Admin/Engineer) with secure session management and an admin analytics dashboard tracking team performance metrics across extraction success rates, work timelines, and hourly productivity patterns
- Automated PowerPoint report generation by populating structured slide templates with extracted OCR inspection data using python-pptx, eliminating manual report compilation

FinaXMan Group Expense Splitting — Android Application

Group Project

- Developed a group expense-splitting Android app (Kotlin + Supabase) supporting equal and custom split methods with real-time balance tracking across multiple groups

- Integrated CameraX for in-app receipt capture, allowing users to attach and browse photo receipts directly linked to each expense
- Built a settlement approval workflow enabling users to submit payment requests, with live notification alerts and automatic balance updates upon approval
- Designed a multi-screen app covering group management, expense tracking, and user profile features, backed by a cloud database ensuring data consistency across all group members

SULAM Nanas — Industry Collaboration with Lembaga Nanas Malaysia

Group Project

- Developed a dual-platform farm management system comprising an Android mobile app for field agents and a web-based admin panel, enabling pineapple farmers to log and monitor farm activities across harvest, fertilizer, and pesticide records
- Built farm record logging screens with date pickers, crop type/grade selection (MD2, Morris), quantity, quality assessment, and estimated market value, providing structured data collection for field use
- Designed an admin web dashboard with analytics and reporting views (Chart.js), supporting farm data oversight, entrepreneur management, and announcement broadcasting to registered farmers

DermaExpert Skin Problem Diagnosis System

Group Project

- Built an AI-powered acne diagnosis desktop application (Python + Tkinter) combining a trained Keras CNN model to classify 6 acne types from uploaded skin images with confidence scoring
- Designed a rule-based expert system that cross-references predicted acne type with user-reported symptoms (pain, itch, burn) to generate personalised skincare advice across all symptom combinations per acne class
- Integrated a low-confidence warning system that flags predictions below 70% confidence and recommends dermatologist consultation, improving diagnostic reliability for edge cases

PROFFESIONAL CERTIFICATION

Oracle Certified Foundations Associate — Database | Oracle Corporation

2026

INVOLVEMENT

Facilitator, Ekspedisi Lestari Teroka Alam — UTeM Sustainability Programme

2025

- Designed and facilitated hands-on biodiversity and sustainability activities for 205 primary school students across 2 schools; created programme materials including promotional posters

Participant, Raspberry Pi Pico D'FTMK-A-THON

2025

- Developed an embedded health monitoring prototype using Raspberry Pi Pico that reads body temperature from a sensor and triggers audio alerts based on configurable threshold conditions

ADDITIONAL INFO

Technical Skills:

Languages: PHP, Python, Kotlin, JavaScript, HTML, CSS, Java, C++

Mobile: Android (Kotlin)

Database: MySQL, Supabase, PostgreSQL, SQLite

Tools & DevOps: Git, Github, Android Studio, XAMPP

AI / ML: Gemini API, Keras, TensorFlow, CNN

Productivity: Microsoft Word, Microsoft PowerPoint, Microsoft Excel, Canva

Soft Skills: Communication • Teamwork • Problem Solving • Time Management • Adaptability • Fast Learner

Languages: Malay (Native), English (Intermediate)
